

# Subprocessor List

## Subprocessor List

Last Updated: September 19, 2025

Version: 1.0

This document lists all subprocessors (third-party service providers) that 6 Hour AS engages to process personal data during the pre-launch phase of Stallo.

---

### Current Subprocessors

#### Infrastructure Provider

##### Amazon Web Services (AWS)

- Service: Cloud hosting and storage
- Data Processing: Website content, waitlist form submissions, email notifications, and technical logs
- Location: European Union (eu-central-1)
- Safeguards: Adequacy decision (EU), Data Processing Agreement

---

### Future Subprocessors

Once Stallo launches with AI functionality, we plan to engage:

- OpenAI LLC – GPT model API services (US)
- Anthropic PBC – Claude model API services (US)
- Google Cloud – Gemini model API services (EU/US)

These will only start receiving user content when Stallo's AI features are activated.

This list will be updated and customers will be notified before activation.

---

### Change Log

Date	Change	Subprocessor	Reason
2025-09-19	Initial list	AWS	Pre-launch setup

---
